Summary

U.S. unmanufactured tobacco exports during June 1985 were 10.259 tons, valued at $61 million, a volume increase of 50 percent from June 1985. June flue-cured exports were up 87 percent from the previous year. Exports of burley tobacco rose 37 percent from June 1985. Cigarette shipments during June 1986 totaled 5.4 billion pieces, a 96 percent increase from June 1985.

Meanwhile, unmanufactured tobacco imports for consumption (duty paid) during June 1986 totaled 13,671 tons, down 11 percent from June 1985. General imports (actual arrivals) of unmanufactured tobacco totaled 16,246 tons, down 34 percent from June 1985.

On July 25, 1986 , Japan Tobacco Inc. announced that beginning April 1, 1986, it will start a 3 year company reorganization which include the closure of two of its 34 plants.

The Government of South Korea has announced several changes within the domestic cigarette market including the beginning of importation of foreign produced cigarettes.

In an effort to boost government revenues, the Government of Morocco has announced price increases on all manufactured tobacco products.

Trade figures from Spain indicate that U.S. leaf tobacco imports during the January-June 1986 period have dropped 29 percent from the same period of 1985.

Tobacco export shipments from Greece during January-May 1986 have fallen 10 percent from the same period of 1985.

The tobacco auctions in Malawi and Zimbabwe continue with 1986 prices (in constant dollars) above those of 1985.

On July 31, 1986, the USDA's Commodity Credit Corporation announced the sale of 32,000 tons of the 1983 burley tobacco crop for $44.2 million.

On July 29, 1986, the U.S. flue-cured tobacco auction markets opened in Florida and Georgia with prices averaging $2.69 per kilogram.

World Developments Affecting Tobacco Demand

In Japan, Japan Tobacco Inc. (JTI) has confirmed a July 25 report that starting on April 1, 1988, JTI will begin a 3-year reorganization program which includes the closure of two of its 34 cigarette factories. Scheduled to be closed are the Hatano and Gifu plants with a combined output of 16 billion cigarettes a year. (In 1985, Japan produced a total of 303 billion cigarettes). This reorganization is a result of the privatization of the Japanese Tobacco monopoly in April 1985, which has slowly led to increased market share for imported cigarettes. The increased pressure from imports is forcing JTI to produce better quality cigarettes and to economize in its operations by closing inefficient plants. The reorganization will reduce JTI personnel by 7,000 to 25,000 in 5 years starting fiscal 1986. It was suggested earlier in the Japanese Press (Nikkei Editorial 1984) that the two plants should be sold to foreign cigarette companies to reduce trade friction and maintain employment. At this this point however, no official position has been expressed on that option. Japan is the largest consumer of U.S. leaf exports, accounting for about 20 percent of the total U.S. export volume. Despite the uncertainty caused by JTI's reorganization, their continuing need for quality imported leaf should allow the United States to maintain its favorable position as the leading supplier.

On July 21, 1986, the Government of South Korea announced that it will open its domestic market to imports of foreign cigarettes by September 1986. Under the new plan, Korean nationals will be permitted to freely purchase and smoke foreign cigarettes. The liberalization of the domestic cigarette market has generated intense opposition from South Korean tobacco producers who are totally dependent upon the domestic cigarette industry for their income. Despite the grower opposition, the government's move toward liberalization is intended to show their determination to remain competitive in the international trade arena. Along with this announcement, legislation has been drafted for consideration in September 1986 which would transform the government controlled Office of Monopoly into a public corporation. The policy reversal should benefit U.S. tobacco producers in two ways by increasing the consumption of U.S. cigarettes and could necessitate increased purchases of U.S. tobacco to improve the competitive quality of domestically produced cigarettes.

On July 21, 1986, the Moroccan Government raised the administratively controlled retail prices on cigarettes, cigars, and pipe tobacco by 7 to 29 percent. The price increase, the first since September 1983, was implemented to increase cigarette tax revenues and to compensate for higher tobacco import costs. Prices on domestically produced cigarettes rose from 7 to 15 percent to a new price range of US$0.25 to US$0.85 per pack. Prices on British cigarettes rose 17 to 29 percent to a new price range of US$1.55 to US$1.80 per pack. Prices on U.S. produced cigarettes rose 16 to 17 percent to a new price range of US$1.55 to US$1.60 per pack.

Figures released from Spain indicate that U.S. leaf tobacco imports for January-June 1986, have dropped 29 percent compared to a year ago. The sharp decline is attributed to the following factors: (1) stevedore strikes which affected deliveries, (2) imports of oriental and flue-cured tobacco from sources other than the United States, (3) increased use of expanded non-U.S.tobacco in the manufacturing of American-blend cigarettes to the detriment of regular U.S. tobacco utilization, and (4) a more gradual shifting of consumer preference to American blends than anticipated. Despite the above, trade sources are of the opinion that imports of U.S. leaf tobacco will only show a moderate decline at the end of the calendar year.

World Developments Affecting Tobacco Supply

Greek tobacco exports for the month of May 1986 totaled 5,805 tons, valued at US$12.6 million. Leading destinations were Algeria (2,014 tons), the United States (1,840 tons), and Czechoslavakia (749 tons). For January-May 1986, exports totaled 43,443 tons, valued at US$111.5 million. This represents a 10-percent decrease in volume from last year's January-May figures of 48,411 tons.

In Malawi, after 14 weeks of sales ending July 17, 1986, 43,660 tons of tobacco (all types) were marketed, valued at 131 million Kwacha (US$73 million), averaging 3 Kwacha per kilogram (US$ 1.68). Quantity auctioned and prices for each tobacco type are provided below.

Type Tobacco	Quantity in Metric Tons 1985	1986	Avg. Value/Kg 1985 1/	1986 1/
Burley	16,913	21,627	K1.94 US$1.20	K3.01 US$1.68
Flue-cured	14,450	15,806	K2.52 US$1.46	K3.27 US$1.83
Fire-cured, Main crop (Northern Div.)	3,295	3,491	K1.96 US$1.14	K2.79 US$1.56

Fire-cured, Main crop (Southern Div.)	355	367	K1.10 US$0.64	1.77 US$1.00
Sun/Air-cured	843	724	K1.15 US$0.67	K1.78 US$1.00
Total All Types	36,741	43,659	K2.11 US$1.22	K3.00 US$1.68

1/ 1985 US$0.58 = 1 Kwacha.
1986 US$0.56 = 1 Kwacha.

The Tobacco Marketing Board of Zimbabwe has reported continued strong prices and after 15 weeks of sales ending July 30, 1986, 67,375 metric tons of flue-cured tobacco had been auctioned, valued at Z$213 million (US$121 million), at an average price of Z$3.15 (US$1.80) per kilogram. Although in constant Zimbabwe dollars, the average flue-cured price during 1986 has risen about 11 percent, in real terms, the value in U.S. dollar terms has declined. Sales and price comparisons between 1986 and 1985 are provided below.

Zimbabwe Auction Report
Sales Ending Week 15
July 30, 1986

Quantity in Metric Tons		Average Value/ Kilogram	
1985	1986	1985	1986
51,040	67,375	Z$2.85 US$1.85	Z$3.15 US$1.80

1/ 1985 US$0.65 = Z$1.00.
1986 US$0.57 = Z$1.00.

U.S. Tobacco Developments

USDA'S Commodity Credit Corporation announced on July 31, 1986, the sale of 32,000 tons of the 1983-burley tobacco crop for $44.2 million ($1.37 per kg.). The sale consisted of 24,400 tons of strips and 7,800 tons of stems.

The tobacco sold was acquired by the CCC on May 7, 1966, from the two grower-owned burley stabilization cooperatives as mandated by the Consolidated Omnibus Budget Reconciliation Act of 1985. On June 13, 1986, the CCC invited bids on the tobacco. The successful bids ranged from $4.08 per kilogram to $0.91 per kilogram and averaged $1.72 for the strips.

CCC plans to offer the remaining 64,200 tons of the 1983 crop again during August with the sale to be completed prior to the opening of the burley auction market on Nov. 17, 1986.

The flue-cured auction markets in Florida and Georgia opened on July 29, 1986. On the first day of sales about 1,000 tons were sold at an average price of $2.69 per kilogram. On opening day last year, 1,300 tons sold at an average price of $2.98 per kilogram. As of Aug. 14, 1986, the 11th sales day, a total of 43,809 tons had been sold at an average price of $3.04 per kilogram. This is down from the 45,132 tons at $3.35 during the first 11 days last season. The lower prices this season are the result of the revised tobacco price support program that substantially reduced price support levels for both flue-cured and burley tobacco. The quantity sold is lower because the 1986 crop is later than the 1985 crop.

U.S. Tobacco Trade Developments, June 1986

U.S. Unmanufactured tobacco exports during June 1986 were 10,259 tons, valued at $61 million, an increase of 50 percent in volume from June 1985. Flue-cured tobacco exports in June 1986 were up 87 percent from the previous year. Exports of burley tobacco rose 37 percent from June 1985. The Federal Republic of Germany was the leading market during June 1986 taking 3,197 tons, followed by the Netherlands with 1,588 tons, Italy with 736 tons, Japan with 651 tons, and the United Kingdom with 647 tons. For January-June 1986, exports were 92,016 tons, valued at $552 million, a decrease in volume of 7 percent from the same period in 1985. The leading markets were the Federal Republic of Germany (18,395 tons), Japan (12,191 tons), Netherlands (7,902 tons), Italy (7,622 tons), and Thailand (5,899 tons).

Flue-cured tobacco exports during June 1986 totaled 4,987 tons, valued at $33 million, an increase of 87 percent in volume from June 1985. Nonetheless, for January-June 1986, flue-cured exports were 35,041 tons, valued at $223 million, down 27 percent in volume from a year ago. Leading markets were the Federal Republic of Germany (8,959 tons), the United Kingdom (3,600 tons), Italy (3,383 tons), Thailand (2,484 tons), and Australia (2,121 tons).

Burley tobacco exports increased by 37 percent in June 1986 compared to the previous year, with shipments totaling 2,503 tons, valued at $16 million . For January-June 1986, burley exports were 34,813 tons, valued at $225 million, a 3-percent increase from a year ago. Japan was the leading market, receiving 10,094 tons. Other major markets were the Federal Republic of Germany (7,128 tons), Italy (3,852 tons), the Netherlands (3,550 tons), and Thailand (3,415 tons).

Cigarette exports rose markedly during June 1986 compared to the previous year. With shipments totaling 5.4 billion pieces, valued at $112 million, an increase in volume of 96 percent from June 1985. For January-June 1986, cigarette exports totaled 29 billion pieces, valued at $599 million, an increase of 14 percent in volume from the same period a year ago.

Unmanufactured tobacco imports for consumption (duty paid) during June 1986 were 13,671 tons, valued at $35,737, an 11-percent decrease in volume compared to June 1985. For January-June 1986, imports for consumption were 99,982 tons, valued at $292 million, an increase in volume of 8 percent from the same period of 1985. Oriental leaf imports were 35,649 tons, valued at $1272million, down 5 percent in volume from the previous year.

General imports (actual arrivals) of unmanufactured tobacco for June 1986 were 16,246 tons, valued at $39 million, a decrease in volume of 34 percent from June 1985. For January-June 1986, general imports were 122,023 tons, valued at $355 million, an increase in volume of 8 percent from last year. Oriental imports were up 5 percent, while other cigarette leaf imports were up 28 percent.

Special Report: World Tobacco Supply and Distribution

World stock levels on Jan. 1, 1986, reached a record high of 7.6 million tons. This is a 4-percent increase over the 1985 figure of 7.3 million tons. World tobacco consumption during 1985 rose by 4-percent over 1984. A 6-percent increase in world leaf production offset the higher consumption. World tobacco exports fell slightly, compared to a 2-percent rise in 1984.

World leaf consumption in 1985 totaled 5.93 million tons, a record high and 209,258 tons greater than in 1984. China, the world's largest tobacco consumer, had a 10.7-percent increase in leaf consumption, reflecting a 10.7-percent increase in cigarette consumption. Within the EC-10, consumption rose by 10-percent during 1985, due entirely to increases in the Federal Republic of Germany, France, the Netherlands, and Belgium/Luxembourg. Among the remaining members, consumption during 1985 either fell or remained constant. Leaf consumption also rose in Brazil, the Philippines, and India, with increases of 9-percent, and 3-percent, and 2-percent, respectively. Unlike these countries, however, consumption figures for the United States and Japan showed a decline by about 5-percent in both countries.

World tobacco stocks levels as of Jan. 1, 1985, were 105,819 tons, 1.5 percent above the 1984 level. Without the 91,000-ton stocks increase experienced in China, however, the 1985 increase would have been negligible. Also experiencing stocks increases were the United States and Greece. The Netherlands, Italy, and the United Kingdom recorded declines in stocks of 12.5-percent, 8-percent, and 8-percent, respectively.

World leaf trade during 1985 remained near the 1984 levels. Turkey, Brazil, Zimbabwe, and Argentina had increases in tobacco exports of 47 percent, 7 percent, 14 percent, and 16 percent, respectively. Leaf exports were down in India, Greece, and Italy, by 20 percent, 15 percent, and 12 percent, respectively. Of the major importing countries, the Federal Republic of Germany and the Netherlands had increases in imports of 25 percent and 9 percent respectively, during 1985. Leaf imports into Japan, the United Kingdom, and the Soviet Union all remained near 1984 levels.

World leaf production in 1986 is forecast at 5.95 million tons (dry weight), a decrease of 5 percent from 1985. Most of the overall decrease is due to reduced production in China, the United States, and Brazil where production is forecast down 8 percent, 14 percent, and 13 percent, respectively. However, production is forecast higher for several countries including Mexico, Zimbabwe, India, Indonesia, Bulgaria, Turkey, and Greece.
